

SUB-THEMES

- 1. Climate Change and Business Sustainability**
 - Climate adaptation and mitigation strategies
 - Corporate sustainability initiatives
 - Net-zero and carbon neutrality
- 2. Sustainable Supply Chain Management**
 - Green supply chain practices
 - Sustainable sourcing and procurement
 - Supplier sustainability assessment
- 3. Supply Chain Resilience**
 - Climate-induced supply chain disruptions
 - Risk management and business continuity
 - Resilient global value chains
- 4. Green Logistics and Transportation**
 - Sustainable transportation systems
 - Low-carbon logistics
 - Reverse logistics and waste reduction
- 5. Digital Transformation in Supply Chains**
 - Artificial Intelligence and Machine Learning
 - Blockchain and supply chain transparency
 - IoT, Big Data, and predictive analytics
- 6. Circular Economy and Resource Efficiency**
 - Circular business models
 - Recycling and resource optimization
 - Sustainable production and consumption
- 7. Climate Finance and ESG**
 - Green finance and sustainable investments
 - ESG reporting and compliance
 - Corporate governance for sustainability
- 8. Global Business Transformation**
 - Sustainable business models
 - Organizational change and innovation
 - Climate-responsive business strategies
- 9. Industry 4.0 and Sustainable Manufacturing**
 - Smart manufacturing systems
 - Renewable energy integration
 - Energy-efficient industrial operations
- 10. International Trade and Environmental Policies**
 - Climate regulations and global trade
 - Carbon border adjustment mechanisms
 - International sustainability standards

11.Consumer Markets and Green Innovation

- Green marketing and consumer behavior
- Sustainable product innovation
- Eco-labeling and responsible consumption

12.Agriculture, Food Systems, and Climate Change

- Sustainable agriculture
- Food supply chain resilience
- Climate-smart farming practices

13.Public Policy and Environmental Governance

- Climate governance and policy frameworks
- Public-private partnerships
- Sustainable development goals (SDGs)

14.Emerging Technologies for Sustainability

- Clean technologies
- Smart infrastructure
- Digital solutions for climate resilience

15.Future Perspectives

- Climate-resilient business ecosystems
- Global best practices and case studies
- Emerging trends in sustainable supply chains and business transformation
