

SUB-THEMES

Digital Supply Chain Transformation

- Digital Transformation in Supply Chain Management
- Smart Supply Chains and Industry 4.0
- Internet of Things (IoT) in Supply Chain Operations
- Cloud Computing and Digital Supply Chain Platforms
- Digital Twins for Supply Chain Optimization
- End-to-End Supply Chain Visibility
- Digital Procurement and E-Sourcing
- Intelligent Warehouse and Inventory Management

Emerging Technologies and Innovation

- Artificial Intelligence and Machine Learning in Supply Chains
- Blockchain for Supply Chain Transparency and Traceability
- Big Data Analytics and Predictive Decision-Making
- Robotics and Automation in Logistics
- Edge Computing and 5G Applications
- Autonomous Vehicles and Smart Transportation
- Drones and Last-Mile Delivery Innovations
- Emerging Technologies for Supply Chain Excellence

Sustainability and Green Supply Chains

- Green Supply Chain Management
- Circular Economy and Sustainable Business Models
- Carbon Footprint Reduction and Net-Zero Supply Chains
- Sustainable Procurement and Ethical Sourcing
- Reverse Logistics and Waste Management
- Renewable Energy in Supply Chain Operations
- ESG Practices in Supply Chain Management

Resilience, Risk and Global Perspectives

- Supply Chain Risk Management and Business Continuity
- Resilient Supply Chains in the Post-Pandemic Era
- Cybersecurity and Digital Supply Chain Protection
- Climate Change and Supply Chain Adaptation
- Global Trade, Logistics and Supply Chain Challenges
- Supply Chain Finance and Digital Payments
- Case Studies and Best Practices in Digital, Sustainable and Resilient Supply Chains
